

IN AN EMERGENCY, WHEN YOU CAN'T SPEAK, WE CAN.

Are you or a loved one living with dementia?

It is estimated that 6 out of 10 people living with dementia will wander or walk with purpose at least once. Planning ahead is the key to saving lives. Searchers use the information provided by you when you join MedicAlert's Safe & Found Programme to assist their search efforts.

In partnership with the Thames Valley Police, MedicAlert is proud to announce the national Safe and Found programme.

Keeping MedicAlert members even safer

The Safe and Found programme supports people living with dementia, Alzheimer's and other cognitive or memory loss conditions, to provide a quick and safe return home.

MedicAlert membership costs less than 10p per day; this gives you 24/7 emergency support and peace of mind.

- Internationally recognised ID symbol
- 24/7 worldwide emergency helpline
- Large choice of medical IDs
- Registered nurse checks
- Advocacy function so loved ones can help manage your record
- NHS recommended

"So happy to get my MedicAlert bracelet & Wallet Card with my medical conditions and emergency contact details on today. It's taken a lot of worry off my mind now"

The Herbert Protocol

All members can store their Herbert Protocol, the form used by the police nationally to narrow down the search for a missing individual. By holding this on your MedicAlert record, police can access your vital information without delay.

Search efforts can be focused efficiently, based on an understanding of who they are looking for, what you have done previously and what you may be likely to do.

Completed by yourself or one of your carers, the Herbert Protocol provides peace of mind to your loved ones, as they do not need to remember vital details when under stress.

How does MedicAlert work?

All MedicAlert members wear a medical ID, engraved with the most vital information. In an emergency, their full digital record can also be provided, to aid care decisions.

When a person is missing... they may be unable to recall vital information or they cannot be located.

The ID is the key... providing crucial medical and personal details and pointing to the full record.

The full record...
is just a phone call away,
24/7, including their
Herbert Protocol.

Speed saves lives... to get them home faster or receive the right treatment for their conditions.
